

STORM THE CASTLE

Marshmallow Catapult Workshop

Use popsicle sticks, rubber bands, and some basic engineering skills to build your own marshmallow catapult. We'll test our catapults for maximum destructive potential and then use them to wreck plastic cup castles! Challenge yourself to build structures strong enough to withstand the marshmallow onslaught.

Participants will get to take their catapults (and a baggie of marshmallow ammunition) home with them. No registration required! If you think your child may need help wrapping rubber bands or understanding instructions, please plan to join them in the programming room.
